Abstract

This study aimed at knowing about the attitudes of university student in Gaza toward the Israeli Palestinian peace process. To achieve this , the researcher desgin questioner consists of (55) item, in five domains which are political, economical, social. cultural, and security. After collecting and analyzing date, the results appointed that the level of student attitudes was positive (63.7%) for all domains. The result also pointed that there is singnificat differences between the attitudes according to : Sex, university and political beliefs , where there was no differences according to residence. In the light of these results the researcher recommend that it is necessary to identify the attitudes of student periodically, beside practicing transparency and publication in political Palestinian work.
