Abstract

The study aimed to identify the obstacles that stand in the way of non-governmental organizations in achieving economic development through micro-finance

The study used a descriptive analytical method , and used the method of comprehensive inventory to ensure you get the results represent the total number of members of the community study of 110 individuals , and used the questionnaire as a tool for data collection, where it was distributed to the population of the study by (100%) and the percentage of recovery (90%) , the study concluded several results including: small projects contribute to giving advice and analysis of problems and study the prospects for the future , and it does not seek to provide innovative solutions through the exploitation of raw materials recycled, as well as the small projects contribute to the creation of new jobs, and it does not help in reaching a large number of unemployed to work in addition to the attacks of the Israeli occupation adversely affect the economic projects and small projects in particular.

The study found a number of recommendations to the government level : the need to find new outlets will allow to reduce the impact of the Israeli measures on the business environment in the Palestinian territories, particularly in the field of raw material supply and marketing , as well as the development of legal and regulatory environment that serve small projects , either at the level of non-governmental organizations: the need to training small business owners to manage the projects, either at the level of individual entrepreneurs, it is best to choose a project based on the experience gained and economic status and to meet the needs of the local community, and finally at the level of the financiers of non-governmental organizations.
